Here below, we'll show you how to effortlessly move and migrate old Android phone data including contacts, SMS, photos, call log or videos etc into new phone with ease. You may follow any one of the offered methods to get your problem fixed and change a new device to use now. Method 1. 3 steps to transfer old Android phone data to new device; Method 2. Use Google Drive to transfer Android data to new phone; Method 3. Let G Cloud to migrate/move data to new Android device. Tip: If you don't have a Google Drive account, or don't have G Cloud, you may follow Method 1 to move Android data now. Method 1. 3 steps to transfer old Android phone data to new one Powerful Android data transfer software - EaseUS MobiSaver for Android is designed for great Android users to protect their data security on Android devices. This software allows you to effortlessly restore or transfer Android phone within 3 simple steps. You can free download it and install it on your PC and follow below steps to transfer & migrate Android data to new device now: Google Play Download for PC Step 1. Root old Android phone and connect phone with PC; In order to let EaseUS MobiSaver for Android effortlessly read and transfer data, please root your device first; Then connect the phone with PC so to let EaseUS Android data transfer tool access to the saved data. Step 2. Export/transfer Android data to PC with EaseUS MobiSaver; Your next move is to apply EaseUS MobiSaver for Android read and transfer your data from old Android phone to PC: 1. Connect your Android phone to computer; Install and run EaseUS MobiSaver for Android and connect your old Android phone to the computer with USB cable. Then click "Start" button to let the software recognize and connect your device. NOTE: As the software can only access the rooted Android device, you need to make sure that your phone has been rooted before recovery. 2. Scan Android phone to find all present and lost data; After connected your Android phone, the software will quickly scan the device to find all the existing and lost data including data. You can easily find contacts, SMS, call log, photos etc data you want by choosing the correct file types. 3. Preview and transfer data from Android phone to PC; Preview all found files one by one and then you can select out data you want to transfer. Finally, you can click "Recover" button to transfer and restore the selected data to PC once. Step 3. Import and save data into new Android phone/tablet Connect your new Android phone with PC via USB cable; Allow the computer to access new Android phone; Move and copy old Android phone data such as contacts, SMS, photos or videos etc into new phone. Reboot PC and use old Android data on new phone without any problems. Method 2. Use Google Drive to transfer Android data to new phone If you have Google Drive account, you can also choose to backup your personal data into Google Drive and restore to new Android phone with below steps; Step 1. Configure backup option on Android phone; Go to Settings on Android phone/tablet > Press Backup & reset in Personal section; Check the box next to Back up my data. Step 2. Configure Google account will be used for backup; Click Backup account > Select Google account by clicking on it or add a new one by clicking Add account; Step 3. Sign in Google account and select wanted data to backup now; After this, you can selectively choose wanted data on old Android phone to back up to Google Drive. Step 4. Repeat the above steps and select backups on Google Drive to restore to new Android phone. Method 3. Let G Cloud to migrate/move data to new Android device G Cloud is more like an app which allows you to save your data online for free including contacts, call log, SMS, photos, videos etc. If you have G Cloud installed on your old phone, just follow to migrate data to new Android phone now: 1. Download and install G Cloud on both phones; 2. Launch the app on old phone to start the configuration process; 3. Click New User and create a new account on G Cloud Backup > Enter a valid e-mail address and password and click Sign up; 4. Confirm you have correctly spelled your email and click Proceed; 5. Select data need to be backed up by checking the appropriate boxes and click Done; Then G Cloud will copy your data to the created account and just wait to let the backup process finished. 6. On the new Android phone, install G Cloud and launch the app; 7. Click Existing user / Restore and enter your username with email address and password; 8. Click Restore and check the boxes that you want to restore to new Android phone and click Restore to start the recovery process; 9. Click OK when the backup restoring process is accomplished. Looking to make an exchange between 2 smartphones but don't know how to transfer data from one phone to another? Fret not, this article will teach you the techniques to transfer from phone to phone. These techniques include using Google Cloud, MobiKin Transfer for Mobile and ShareIt. With the help of these phone transfer tools, you are able to complete the phone content transfer with ease. If you are the one who wish to transfer data to new phone, you can go to: Now let's see how these tools work: One of the free and wireless way to transfer data to new phone is using Google Cloud. This service provides you different options to sync different kinds of files between 2 phones, including Google Drive, Gmail account and Google Photos. Hence, you can choose the applicable tool to do the phone file transfer based on your need. Transfer via Google Drive Transfer via Google/Gmail Account Transfer via Google Photos 1. Transfer via Google Drive By using Google Drive, you can transfer various types of files from one phone to another. Its supported files include archive files, audio formats, image files, markup or code, text files, video files, Adobe files, Microsoft files and Apple files. Here is how to transfer everything to new phone using Google Drive: Step 1. Open Google Drive App on your old device. Step 2. Hit the "+" icon appearing at the bottom right of your screen. Step 3. Tap on the "Upload" option and then choose to "Upload photos or videos" or "Upload files". Step 4. Select the files you want to transfer and start transferring them to Google Drive. Step 5. Once Google finishes uploading your files, you can turn to launch the Google App on your new phone. Step 6. Log in to your Google account to set up to your Google account here. Step 7. Find out the data you uploaded just now and download them to your new device. Alternatively, you can also backup the data on your old phone to Google Drive and then restore them to your new device. As for Android users, you can refer to the page "How to Backup Android Data to Google Drive? [Solved]". As for iPhone users, you can get the backup details from the page "[Step-by-step Tutorial] How to Backup iPhone to Google Drive". 2. Transfer via Google/Gmail Account If you are the one who just want to transfer info from one phone to another, such as contacts, then you can choose to move the data via Google account. This is an easy task - you just need to add your Google/Gmail account to your mobile phone and then enable the "Sync" feature. After that, the contacts or other information on your old phone will be synced to the new one. Here are the steps to transfer information from one phone to another: Step 1. Add your Gmail account to your old phone. To complete that, you can: - On Android phone: Go to "Settings" > "Accounts" > "Google" and then sign in with your Google account. - On iPhone: Navigate to "Settings" > "Mail, Contacts, or Calendars" > "Add Account" > "Google" and type in your Google account and passwords also. Step 2. Toggle on the button next to the files you want to transfer like contacts, calendars, notes, etc. and then click on "Save" or "Sync" to sync them to Gmail. (To get more details, you can go to the page "3 Ways to Backup Android Contacts to Google/Gmail Easily" or "How to Sync iPhone Contacts to Gmail Easily".) Step 3. Once done, you can turn on your new phone and start transferring files from Gmail to your Android or iPhone. Supposed that you only sync your contacts from old phone to Gmail, you can follow the steps in "Google Contacts Sync - How to Sync Contacts from Gmail to Android Cell Phone" or "Wanna Transfer Gmail Contacts to iPhone? Means are Here!" to complete the phone transfer. 3. Transfer via Google Photos Google Photos is famous for image and video transfer. If you want to transfer all the photos and videos of your old device to a new one, you can consider this service. And also, this App is easy to use. Guide on how to transfer data from old phone to new phone via Google Photos: Step 1. Open Google Photos App on your old phone and then sign in to your Google account. Step 2. Click on the "Menu" icon and choose "Settings" followed by "Back up & Sync". Step 3. Toggle on the "Back up & sync" option and the photos and videos on your phone will be saved to Google Photos. Step 4. Now you can launch the Google Photos App on your new phone and then download the files to your new Android or iPhone. #2 How to Transfer Data from One Phone to Another via MobiKin Transfer for Mobile? Transferring from phone to phone using Google Cloud is too troublesome for you? Why not choose an all-in-one phone to phone transfer tool to transfer everything from one phone to another with one simple click? This phone transfer tool is MobiKin Transfer for Mobile. It is a professional software that enables you to transfer media files, information or other files from one phone to another. No matter how many kinds of files you want to transfer, you can achieve your goal with one tool. Can't wait to get this powerful program? Just click the icon below to download and install it to your computer. Tutorial on how to transfer stuff from one phone to another; Step 1. Run the installed software and connect both your old and new phone to the computer. Step 2. Follow the prompts on the screen to make 2 phones recognized by the program. Step 3. Check if your old phone is the source device and the new phone is the destination device. If not, please click on "Flip" to change their positions. Step 4. Tick off the file types that you want to transfer to new phone and tap on "Start Copy" to transfer the selected data to your new phone. #3 How to Transfer Everything from One Phone to Another with ShareIt? Another recommended tool is ShareIt. This is the best sharing application that equips the fastest cross-platform transfer speed. In addition, it allows you to transfer data between mobile phones and computer without restrictions. For the people who want to send large files from phone to phone, this would be a good option. Steps to transfer files from phone to phone using ShareIt: Step 1. Download, install and launch ShareIt on both your devices. Step 2. Tap on the "SEND" button on your old phone and choose the "RECEIVE" option on your new phone. Step 3. Select the files you want to transfer and send them to your new phone. Step 4. Accept the transfer on your new phone and the phone to phone transfer will begin. Supposed that you want to get more phone to phone transfer tools, you can go to: The Bottom Line In a nutshell, it's easy to transfer data from one phone to another when you use any of the above-mentioned ways. Thus, if you are going to transfer info or other files from old phone to new phone, don't hesitate to select a method from above and follow the tutorial to complete the phone transfer in no time.
